Crile Carvey Consulting, Inc.

We specialize in .NET software development, with an emphasis on ASP.NET and SQL Server.

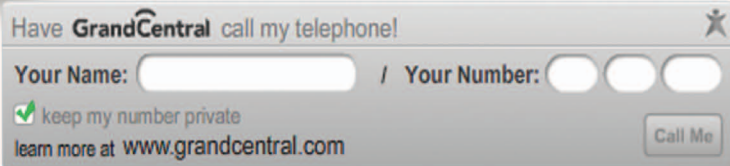

Our clients are typically start-ups or mid-size businesses who require focused assistance with peak demand projects or new technologies. We travel to assist clients with on-site needs, and use our remote development site for focused coding projects.

Utilizing contract resources, flexible staffing policies, and sophisticated Internet-enabled collaboration tools, we are able to handle variable demand cycles with aplomb.

We are a small, nimble organization, with low overhead and high capability. We exceed industry benchmarks, deliver on time, and on target.

We specialize in medium and small projects, working as part of small teams. We prefer to work on limited term contracts, ranging from a few weeks to one year.

Crile Carvey Consulting, Inc. is a Wyoming corporation.

NEWS in the news...

Calfpad Certified for Windows Mobile

We recently developed a PocketPC application using .NET Compact Framework. Calfpad has been certified by Microsoft, and is currently the only "calf-u-lator" listed in their catalog.

Microsoft Office Makeover

Crile Carvey's own Home Office was the recipient of a fantastic makeover in September, 2007, courtesy of Microsoft, HP, and HGTV celebrity designer Vern Yip. Crile's winning entry featured a website aimed at convincing Vern and the gang to make the trip to Wyoming, and it worked! Check out the videos.

**if it were that easy...
you wouldn't need us...**
